## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-16, 19-20, 26-33, 36 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Suzuki et al, of record, for the reasons given in the previous action, hereby incorporated by reference. Applicant's arguments concerning the applicability of the invention to devices employing trench isolation techniques is noted. This inventive structure and concept is taught by Suzuki et al as indicated in the previous action. While the previous action made reference to Fig. 5 of Suzuki merely by way of example, a careful reading of the Suzuki reference shows that the Suzuki structure is also applicable to devices employing trench isolation, as well as LOCOS isolation techniques.

For example, Fig. 15 of Suzuki shows the same inventive concept applied to a trench isolated device, as claimed. See also the discussion in Suzuki at paragraphs [0121] and [0122] where Suzuki makes specific reference to "trench" (91).

Suzuki also specifically teaches applicant's inventive concept in paragraph [0122] with his recitation that "the well region 94 is extended projecting on the pixel region side of sensor 116 so as to surround the interfaces of the trench 91 of the trench device isolation region 93 for pixel isolation."

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2815

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 17, 18, 21-25, 34, 35 and 38-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al and further in view of Rhodes et al, both of record, for the reasons given in the previous action, hereby incorporated by reference. As stated above, since Suzuki does apply specifically to devices utilizing trench isolation, the rejection is proper.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
